Instructions for submitting the pre-recorded talk

Please read through the following information for pre-recording the talks.

Depending on your session, your oral presentation is either
- Long: 14 minutes presentation + 6 minutes Q/A
- Short: 8 minutes presentation+ 4 minutes Q/A

In case of a long presentation, you need to prepare a video of your talk that is between 13:30 and 14:30 minutes, i.e., reference time +/- 30 seconds. In case of a short presentation, you need to prepare a video of your talk that is between 7:30 and 8:30 minutes. The videos will be made available on the conference website for viewing at any time during the conference and on YouTube after the conference. If participants have additional questions after the Q/A, they might ask them via chat.

Video Instructions
- Format: 1920x1080p videos as MP4 files, encoded in high quality encoding (we suggest 6 Mbit/s or more) with H264 codec in 16:9 format. Size limit is 500 MB.
- Audio: Please make sure that the videos have good audio. It is better to use a headset or a microphone. Do not use a build-in laptop microphone or camera. Please use at least 160 kBit/s for the audio stream.
- When presenting, please introduce yourself. We recommend any text/math should use at least 24 point font (and ideally should be >32pt) as smaller fonts will not be readable on small mobile screens.

You can do screen recording from the slides, and you can additionally film yourself with a webcam and add your video as a small video to the slides.

Please use your **paper ID** as your file name with zero padding (e.g., 019.mp4 for paper ID 19) for uploading. Please submit your videos until **Wednesday, 15.9.** to the sciebo link that you have received in the email. The email also contains the duration of your talk.

Do not hesitate to contact us if you have any questions or encounter any problems:
